

DESIGN CONSTRUCT COMMISSION

COMPANY OVERVIEW

Vertically integrated services across the resources,
new energy and infrastructure sectors.

ABOUT PARC

From humble beginnings in 2018, PARC Engineering has grown from strength to strength to become a leading player in the provision of diversified, vertically integrated engineering services across the resources, energy, and infrastructure sectors.

Today, PARC has over 300 employees and now boasts a reputation built on extensive experience gained working on some of Australia's truly iconic industry projects. The business is well positioned to deliver high-quality projects of all sizes and complexity levels.

OUR VALUES

PARC Engineering's policies and values reflect our commitment to exceptional customer service. We focus on quality, integrity and high safety standards to build productive relationships and deliver results.

- ▶ QUALITY DELIVERY
- ▶ STRONG LEADERSHIP
- ▶ SAFE EXECUTION
- ▶ INTEGRITY

**OUR HIGH PERFORMING TEAMS
AND FLEXIBILITY MAKE US A
CONTRACTOR OF CHOICE.**

INDUSTRIES WE SERVE

MINERALS AND RESOURCES

Supporting the mining sector as it transitions to a fully decarbonised model of operating

PARC's extensive expertise, forward-thinking, and responsiveness helps Resources sector clients navigate challenging market conditions. PARC provides solutions right across the mine project lifecycle. We help by responsibly enabling our Resources clients to provide the metals, minerals, and natural resources needed for a better, more sustainable future.

NEW ENERGY

Helping our clients take the leap into the future with new forms of energy

New forms of energy are crucial to completing the transition to a sustainable energy future. PARC Engineering understands this and supports clients on their journey as they transition from traditional forms of energy to new alternatives. From lithium projects that power mobile phones and electric vehicles, right through to completely renewable energies like hydrogen and waste to energy facilities.

INFRASTRUCTURE

Developing core infrastructure for progress essential to humankind

To deliver roads, rail, energy, and resources projects successfully, we support our client project needs through our highly experienced infrastructure division. Operating as a vertically integrated business across heavy industries, PARC's infrastructure capability runs deeper than a one-dimensional, transactional contract as we manage cross industry interfaces across our capability set. We don't just see one piece of the puzzle, we like to look at the whole jigsaw as our path to success.

SERVICES WE OFFER

Engineering & Project Management

Civil & Structural

Mechanical & Piping

Electrical & Instrumentation

Quality Management & Inspection

Commissioning & Completions Management

In Ground Services & Trenching

Plant & Equipment Hire

HEALTH, SAFETY, ENVIRONMENT & QUALITY

At PARC Engineering, we understand the importance of health, safety, the environment and quality is to the foundation and success of our projects. Our Health and Safety, Environmental and Quality systems are certified to ISO standards, and are kept front and centre in everything we do.

FEATURE PROJECTS

To view more PARC Engineering projects visit parcengineering.com.au/projects

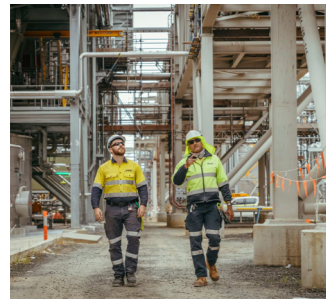

Waste to Energy

Client: Acciona
Industry: New Energy
Services: SMP and E&I services

Woodside KLE Karratha Gas Plant Life Extension

Client: Monadelphous & Giovenco JV (MGJV)
Industry: Energy
Services: Supervision, E&I, maintenance services

Kemerton Lithium

Client: TCD Civil Construction
Industry: Resources, New Energy
Services: E&I, SMP, Engineering, Supervision, Plant & Equipment

Iron Bridge Wet Process Plant Construction

Client: SIMPEC
Industry: Minerals & Resources
Services: E&I, Engineering & Supervision

Yanchep Rail Extension MCR Install

Client: NEWest Alliance
Industry: Infrastructure
Services: In-ground services and electrical

FMG WHIMS Project

Client: Primero
Industry: Resources
Services: SMP

BHP Zero Energy Goldsworthy

Client: Laing O'Rourke
Industry: Minerals & Resources
Services: Project supervision

BHP Car Dumper Refurbishment (CD3)

Client: Monadelphous
Industry: Minerals & Resources
Services: SMP, Supervision, Shutdown service

Bayswater Station Project

Client: Evolve Bayswater Alliance
Industry: Infrastructure
Services: In-ground services, E&I and drainage

Rio Tinto Gudai Darri Project

Client: Laing O'Rourke
Industry: Resources & Infrastructure
Services: Engineering, SMP, Construction & supervision services

OUR LEADERSHIP TEAM

MANAGING DIRECTOR Daniel Debattista

Daniel is the Managing Director of PARC Engineering. He has a mechanical engineering background, punctuated by 20 years of experience across the resources and energy sectors. More specifically, he has worked within the minerals, mining, oil and gas, infrastructure, and power generation industries. Daniel brings a wealth of executive-level experience and is currently responsible for all operational and profitability-related activity within the business.

EXECUTIVE GENERAL MANAGER Andrew Carter

Andrew is the Executive General Manager of PARC Engineering. He brings more than 20 years of experience working in leadership positions across the resources, energy, and infrastructure sectors. In his current role, Mr Carter is accountable for the performance of the PARC Engineering business. Prior to PARC Engineering, Andrew held numerous senior leadership roles to deliver the construction and commissioning of some of Australia's iconic commercial infrastructure projects.

OPERATIONS MANAGER Aaron Canning

In his role as Operations Manager, Aaron leads and oversees the technical execution of the projects within the organisation. His responsibilities include, but are not limited to, the safety of the personnel, planning, quality, client approvals, and providing guidance to our supervision and engineering teams.

Aaron has worked extensively in the construction industry across all facets of large-scale multi-discipline projects in Australia, the United Kingdom, and the United States of America.

GENERAL MANAGER Kieran McElchar

Kieran is a highly motivated professional with experience in construction, project, and operations management. Throughout his career, Kieran has gained experience in the building, infrastructure, and resources industry delivering both EPC and construct-only contracts working on several of Australia's most iconic yet complex and challenging projects including; Optus Stadium, Elizabeth Quay, Gorgon LNG, Sydney Metro Northwest, and Sydney Light rail.

ENGINEERING MANAGER Nic Johnsen

Nic provides technical input and planning for the PARC Engineering portfolio of projects. With over 15 years of experience in the industry, he has been involved in a diverse range of projects in gas processing, compression and pipelines, LNG, mineral processing, and water treatment. He has worked on projects in Australia, Canada, and the United States of America and has experience in both construction and maintenance.

CONSTRUCTION MANAGER John Magee

As Civil Superintendent - Utilities and Services, John brings a wealth of experience to our civil construction projects. With over 35 years of experience in the industry, he has been involved in civil construction projects in mining, oil & gas and infrastructure. John has completed numerous projects with Western Power, Main Roads, PTA, ARC Infrastructure, and Western Australian Airports.

John has worked across Australia, the United Kingdom, and the Channel Islands with various utility companies, water.

PROJECT MANAGER Michael Davies

Michael is a highly proficient project manager with over 14 years' management experience. A highlight of his career has been taking a business from inception, to over 150 employees undertaking remote operations on both the East and West coast of Australia.

Michael has a consistent track record of delivering value & operational excellence for blue-chip & mid-tier clients in industries spanning construction, resources, power and utilities, defence, and renewables. He has successfully navigated through the challenges presented by periods of economic contraction and growth.

HSEQ MANAGER Darren Williams

Darren is an experienced Health, Safety, Environmental and Quality Manager, having worked on a diverse range of projects across Australia.

Problem solving during challenging and high-risk situations is something that Darren has done throughout his career and remains calm and level-headed throughout, while keeping all stakeholders fully informed.

Procedural and reporting compliance targets are the main staples of Darren's activities however he has a passion for the development of strong safety culture across organisational teams.
